11. If I buy more do I pay less?

Our online ordering service allows you to see instantly what you pay for what quantity. Of course the more you buy the less per grouped quantity it will be.

As for producing new products, the longer the run size the better the price per unit, so we can pass the savings on to you.

12. What is flute?

Flute, Corrugation - This refers to the wave shapes, or ridges, that are pressed into a sheet of material that has been softened by steam. This material is then sandwiched between flat sheets of material to form corrugated fibreboard. Flute serves as protective cushioning and helps strengthen a carton. Different widths and configurations offer distinctive performance advantages. Corrugated cartons feature either of the types below.

- **A-Flute** : Flute thickness of 4.7 mm (We do not supply or use this Flute)

- **B-Flute** : Flute thickness of 2.5 mm

- **C-Flute** : Flute thickness of 3.6 mm - Depending upon the stacking strength, puncture resistance, crush strength required for the carton, one of the above three commonly corrugations are used in single-wall, general-purpose cartons. A-Flute has excellent stacking Strength, B-Flute has good puncture resistance and C-Flute has the optimum combination of both.

- **E-Flute**: Flute thickness of 1.5 mm - This is generally used for light applications such as Pizza Boxes, Mailers, Shoe boxes etc.

- **BC Flute** - This flute is a double-wall combination made from one B-flute, single-wall sheet and one C-flute, single-wall sheet. The result is a strong corrugation used when extra thickness or stacking strength is needed.

- **AC Flute** - This flute is a double-wall combination made from one A-flute, single-wall sheet and one C-flute, single-wall sheet. The result is a very strong corrugation used when extra strength is needed. (We do not supply or use this Flute)

13. Do you have minimum quantities?

Yes we do, although we can provide you with very small quantity runs, though the cost for one item can be the same as for 50, due to the set up costs. Typically **we don't sell one box**, we sell in packs of 25 for stock cartons and minimum of 100 for Diecut and RSC custom cartons.

14. How many cartons are on a pallet?

This is dependent on the size of your cartons. But we will make sure it is the most possible to minimise your freight costs. We are also able to limit the height to suit special requirements. e.g. Pallet racking systems, Interstate freight etc.

15. How many colours can I have on my cartons?

4 Colour Process /CMYK and PMS Colours are all available in certain print types.

16. Is there a charge for Artwork?

Artwork costs are incorporated into the price when quoted. This will include printing plates and proofs that are required to be signed before we proceed with any manufacturing.

17. Can you arrange delivery or am I able to use my own preferred carrier?

Yes you can, please advise us at the time of quoting and we will arrange an ex-factory price if you prefer, otherwise we will quote you with delivery included.

If you have a question that we have not listed, please Contact Us via email or phone and we shall assist you in any way we can.

The Seller will apply the insurance proceeds as follows:
(i) first, in payment of the Price of the Goods that are damaged or destroyed, if unpaid,
